

Reward rock-solid performance with rock-solid wireless from SONOS!

This revolutionary sound system connects to your home WiFi network and fills every room of your house with all the music on earth...from iTunes, Spotify, Pandora, SiriusXM radio...*you name it.*

And now **Award Concepts** lets you offer **Sonos** to your employees through a special points program. It's the ideal incentive program. Once they get their first listen to Sonos' crystal-clear HiFi surround sound, they'll want to keep earning points to grow their system.

Everything needed for the ultimate in wireless home audio is in our program: bridge, playbar, speakers, amp, sub, and more. The system is simple to set up and control via any smartphone, computer or tablet. And the points program is a cinch to administer, with the pros at **Award Concepts** behind you.
